

Blumcraft® 

Security Latch  
for Panic Devices

**CRL®**

The Blumcraft Security Latch is the latest advancement in panic handle engineering, once again elevating the Blumcraft brand to the peak of panic device design and performance.

Featuring a distinct flat back, the latch enhances security by providing stronger engagement with the strike to keep glass doors hardened and resilient against exterior pull force.

- Provides superior security over standard roller latches
- Maintains smooth roller operation
- UL 305 listed
- Max door height of 12 feet
- Comes with all PA100, PA110, PA300, BP100, DPA100 and DPA110 panic handles
- Existing Blumcraft panic handles can be retrofitted
- Blue strip on latch should not be visible when installed, indicating sufficient engagement with the strike
- For use with CRL PK and ESK strikes
- Patent No. US 12,054,970 B2 for push pad emergency exit device with vertical security latch bolt assembly
