

SBEP EPDM Setting Blocks

CRL SETTING BLOCKS
EPDM Setting Blocks

DESCRIPTION

CRL EPDM Rubber Setting Blocks are durable and have better resistance to the effects of weather and ultraviolet rays.

APPLICATIONS

CRL EPDM Rubber Blocks are preferred for use in places where there is potential for contact with fuels and/or ozone. The composition of the blocks make them resilient so that glass cushioned by them can withstand vibration shock, high and low temperatures and heavy wind loads.

NOTE: Do not use with silicone sealants, as there is potential for bleed through of color.

TECHNICAL DATA

HARDNESS (Shore A)	80 +/- 5
TENSILE STRENGTH	725 PSI
ELONGATION	200%
TEMPERATURE	-22 deg F to 212 deg F

IMPORTANT INFORMATION

The information cited is in good faith and has been established from sources held to be secure and reliable. The values listed are typical properties and are not intended to be used as specifications for defined applications. User must determine the product suitability for the end use application and assume all risks and liabilities.
