Wall Mount Hinge – Offset Back Plate

CAT. NO. V1E044

***NOTE:** Do not exceed either maximum weight or width when choosing proper quantity of hinges.

Important Information:

This hinge contains a dual degree pivot pin. The pivot pin is set for normal door closing position. You have the option of altering the closing position of the door 5 degrees inward by utilizing the opposite side of the pivot pin, which has been pre-machined (see Section 3 of Cat. No. SDT22 Frameless Shower Door Guide for this procedure). Special order custom pivot pins are available (Cat.No. VIEP1N) that can be machined at any angle up to 45 degrees.

Specifications:

| Glass Sizes: | 3/8" (10mm) to 1/2" (12mm) thick tempered safety glass |
|-----------------|---|
| Construction: | Solid brass |
| Closing Type: | Self-centering when within 15 $^\circ$ of closed position |
| Cutout Required | |
| Includes: | Gaskets, screws and template |
| | |

Maximum Door Capacities for Two Hinges or Three Hinges

| - | - | - |
|----------------------|-----------------|-----------------|
| Maximum Door Weight: | 100 lbs.(45 kg) | 130 lbs.(59 kg) |
| Maximum Door Width: | 34"(86mm) | 34"(86mm) |

Use of Gaskets:

For 3/8" (10mm) Glass: Use one thick gasket on each side For 1/2" (12mm) Glass: Use one thin gasket on each side

Recommendations:

For public safety, we recommend the use of only tempered safety glass. Do not use power tools when installing these hinges.

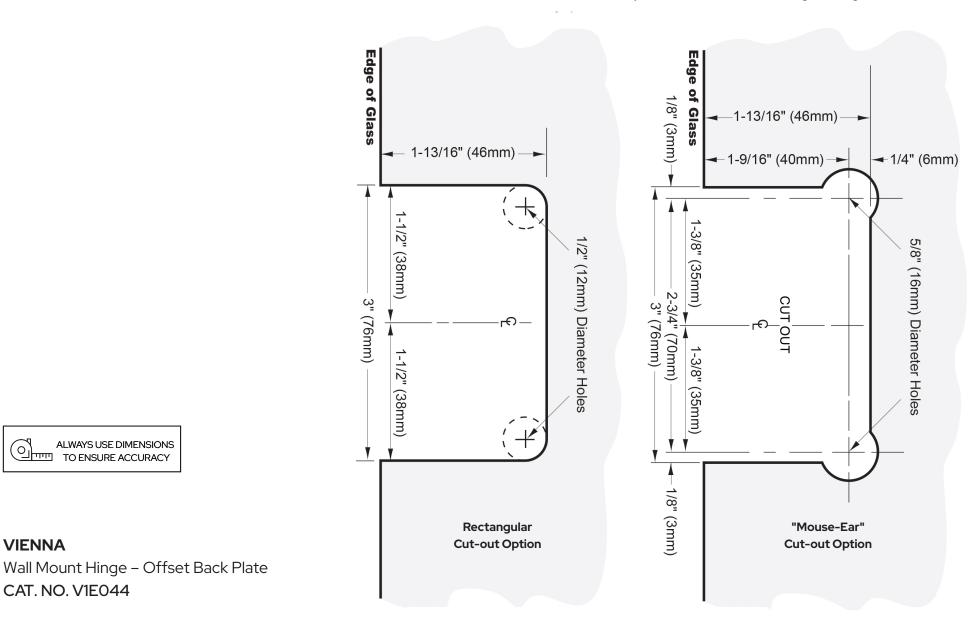

Maintenance Guidelines:

- Our hinges are greased at the factory for quiet and trouble-free operation. If there is any squeaking that occurs after installation, put a drop of "3 in 1 Oil" (also known as "household oil") on the white nylon washer that the hinge body pivots on. This washer is the component that acts as a buffer, so the body of the hinge doesn't pivot directly on the brass center block. This solution doesn't require the disassembly of the hinge. Note: Do not use spray lubricant on these hinges. If the hinge has been disassembled, upon re-assembly, use white lithium grease to lubricate the interior mechanism.
- Never use an abrasive cleaner on the hardware. Many of the components are coated with a clear lacquer that will be irreparably damaged if subjected to harsh, abrasive chemicals. Advise your customer that drying the hardware with a clean, soft towel on a daily basis is the best way to maintain the hardware. If mineral deposits build-up, mix a couple of drops of a mild liquid soap (such as lvory or a similar product) into a cup of warm water. Using a soft, non-abrasive cloth, clean the hardware. Rinse thoroughly with clean, warm water and dry.
