

## KKB12 SINGLE EDGE BLADES

### **Product Description**

CRL KKB12 Single Edge Blades are crafted using proprietary grinding technology, resulting in a harder and sharper edge. This durable edge ensures longer-lasting performance while maintaining exceptional sharpness for superior initial cutting. The blade features high carbon steel and steel backing construction with a .012 thickness. This hard blade is ideal for removing labels, adhesive, dried paint, and other materials from most flat surfaces.

### **Product Features**

- Made of high carbon steel and steel backing for extra durability and long life.
- Heavy duty .012 thickness.
- Comes in a clamshell 100-pack for convenient storage.
- 2 facet, square corner, oiled, uncoated.

### **Product Benefits**

- Scrape, trim, or cut effortlessly with these extremely sharp single-edge blades.
- Universal fit: compatible with most standard single-edge scrapers, box cutters, and other single-edge blade tools, allowing for interchangeability based on your task.
- Optimized .012 thickness for greater strength and durability than regular duty single edge blades.
- Ideal for various projects, including removing paint and decals from windows, cleaning a glass stovetop, or industrial uses such as removing material buildup on machinery, among many other jobs.

**Additional Product Information**

UOM	CA- Case
Packaging Configuration	100 blades per clamshell, 50 clamshells per case
Case UPC/GTIN	843382101114 / 00843382101114
Country of Origin	Mexico

**Safety**

Wear eye protection. Handle and use with care. Keep out of children’s reach. Dispose of safely.

**Warnings**

Blades are extremely sharp. Bending blades may break them.
