- Thermally Broken
- Available with Sidelite

The **Series 900 Terrace Door with Low-Profile Threshold** is a high-performance outswing door that's ideal for hotels, resorts, high-rise condominiums, and apartment complexes. It has been designed to meet FHA accessibility standards. The low-profile threshold virtually eliminates floor level protrusions to provide unobstructed passage for individuals with a disability.

The **Series 900 Terrace Door with Low-Profile Threshold** can withstand heavy traffic and severe weather conditions while maintaining its premium and elegant look. The 1" x 4-1/2" (25 mm x 114 mm) frame is thermally broken and accepts 1" insulating glass. For maximum security, the door incorporates a five-point locking device. You can select from three handle styles in 7 finishes.
