**General Note:** *All testing was performed in accordance with the referenced standard(s).*

*Note 1: Loads were held for 10 seconds.*

*Note 2: Tape and film were to seal against air leakage during structural testing. In our opinion, the tape and film did not influence the results of the test.*

*Note 3: Test performed after the application of uniform load preload.*

*Note 4: Test performed after the application of uniform load deflection load.*
