STRIKE OPTIONS

Faceplate/Lock Strike

Yes No

The Faceplate/Lock Strike is available in polished and brushed stainless steel. The brushed stainless color should be used when installing polished brass, satin chrome or brushed stainless housings.

When striking into metal jamb the Lock Faceplate can be used as a template for locating the slot for the Strike.

Glass Mounted Keepers

Handle options to match housing?

Inside: Yes No

Outside: Yes No

Warning: Handles should only be used when strike is mounted on an operating door.

Warning: When using the Glass Mount Keeper on a pair of doors, please make sure the door receiving the Keeper has a lock at the top or bottom of the door.
