Sound mitigation meets visual appeal.

The Fallbrook XL Interior Partition System strikes a balance between acoustic performance and aesthetics. Featuring 1" insulating glass panels, the system provides sound attenuation for enhanced privacy in applications such as government buildings, law firms, executive offices, human resource departments, and conference rooms.

Visually, Fallbrook XL is designed with a low-profile door frame and vertical extrusions, which sets it apart from traditional framed partition systems. This leads to greater visibility and daylight diffusion.

Features & Benefits

- Utilizes dual glazing to mitigate sound
- Low-profile 1-7/8" framing
- STC 42 rating for fixed glazing
- Front load, dry-glazed system
- Maximum door height: 10 feet
- Maximum door width: 36"
- Compatible with wood or glass pivot doors
- For use with laminated or monolithic glass
