

# Versalite™ Skylight System— high-performance, pre-engineered, pre-assembled ready to install skylights

The Versalite™ fully guttered framing system is **shipped completely assembled and pre-glazed**, ready to install on your curb.

Standard glazing includes insulating glass units. The Versalite™ skylight system features a **patented glazing clip**, which creates a thermal break between the one-piece glazing caps and the framing members and provides for uniform compression on the glazing material using EPDM gaskets. The perimeter framing is also thermally broken to provide **maximum energy performance** and reduce condensation. Choices include pyramids and ridges, all of which can be assembled at the factory thereby saving the high costs of field assembly.

## Versalite™ Features

- 1" Insulated laminated glass
- Integral condensation gutters on all framing members
- One-piece glazing caps – no exposed fasteners
- Dry-glazed system requires no sealant
- Available painted in Kynar 500®/Hylar 5000® finish or anodized finish
- Shipped pre-glazed and pre-assembled
- Ridge, Pyramid and Hip-Ridge available
- Available up to 8' square or 8' wide x unlimited length

## Finishes

Paint options include Kynar 500®/Hylar 5000® paint, color to be selected from our color chart featuring 20 standard colors, with units ready to ship 8 weeks after release for production. Finish options include clear and bronze anodized, with units ready to ship 6 weeks after release for production. The shipment schedule is subject to change based on project size and glass schedule.

## Tested Performance

### Static Air Infiltration @ 6.24 PSF per ASTM E283-91

Allowable: .5 CFM/FT

Tested: .1 CFM/FT

Result: Pass

### Static Water Infiltration @ 15.0 PSF per ASTM E331-93

Allowable: No Uncontrolled Water

Tested: No Uncontrolled Water

Result: Pass
