CRL INTERIOR DOOR HANDLES

CRL Electronic Egress Control Handle

- For 1/2" (12 mm) or 3/4" (19 mm) Tempered Glass
- Custom Sizes of Stock Finishes
 Ship Within Three Business Days
- Optional Keyed Access Device
- Optional Magnetic Locks
- Optional Exterior Fixed Handles
- Available in Polished or Brushed Stainless Steel, Polished or Satin Brass, and Oil Rubbed Brass*

Electronic Egress Handle (EEH) Specifications and Features

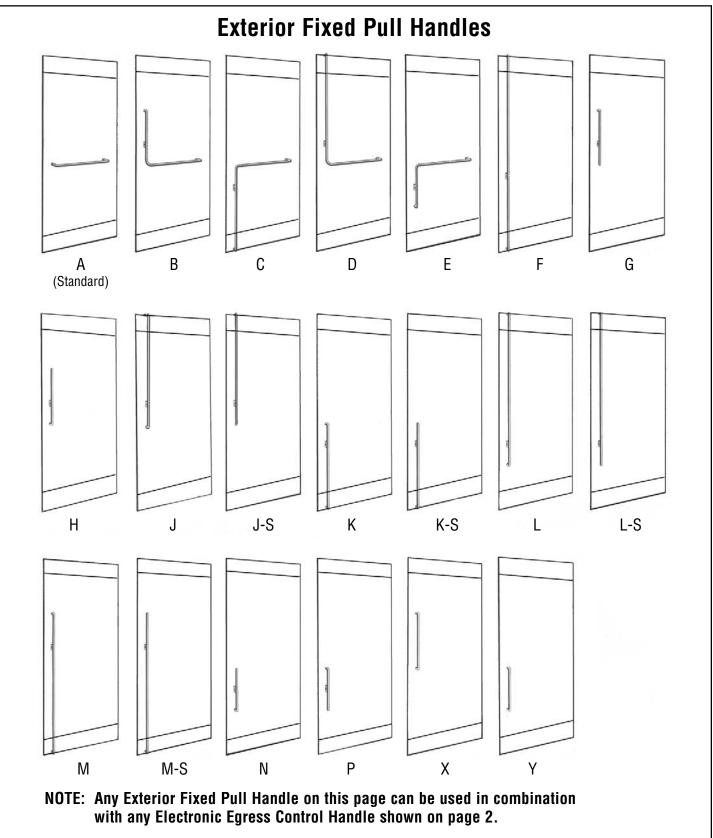

- The EEH is field convertible from Fail Safe to Fail Secure. Our standard unit will be Fail Safe, and we can factory set for Fail Secure as requested.
- The EEH is available in the same finishes and sizes that we established for the manual panic handle. This unit has the same heavy duty construction as our Panic Handle, but the actuation movement has been reduced to an almost imperceptible amount.
- The internal components are "Water Resistant" and no electronic logic circuits are used. Our EEH is suitable for use in any environment specified for the electronic lock being used.
- The wiring/hook-up of this unit is greatly simplified as it does not require power for operation. We provide the cable with a labeled and pre-wired terminal block.

Technical Specifications:

- Power: 12-24 Volt AC or DC
- Maximum Power Input: 24 Volts @ 3 Amps (or 72 Watts)
- Current Drawn: None
- Contact: 5 Amps @ 32 Volts
- * NOTE: This is Not a Panic Device
- * Oil Rubbed Brass Finish is Custom and has a 7-10 Day Lead Time

- Our handle uses a sealed mechanical switch, which eliminates issues of touch sensitivity and adjustment particularly when moisture is present.
- Unlike other handles that must have a lacquer coating to prevent external actuation, our bars are brushed or polished Stainless Steel for greatly improved finish life.
- Our EEH actuates with a force far less than that required to open the door, providing exceptional safety for frail or disabled persons.
- Appearance exactly matches our Panic and Deadbolt Handles for mixed Installations
- **OPTIONAL:** Exterior Keyed Access Device
- Wire: 4 Conductor, 22 Gauge, 17 Ft. Provided
- Use: Indoor and Outdoor (Lock Must Be Rated For Outdoor Use)

CRL EXTERIOR PUSH/PULL HANDLE COMBINATIONS FOR ELECTRONIC EGRESS CONTROL HANDLES

CRL SUGGESTED GUIDELINES

CRL Recommends that Door Height be Limited to:

1/2" (12 mm) Glass:

Exterior Openings: 8'-0" (2.44 m) Interior Openings: 8'-6" (2.59 m)

3/4" (19 mm) Glass:

Exterior Openings: 8'-6" (2.59 m) Interior Openings: 9'-0" (2.74 m)

- **NOTE:** If doors exceeding these recommendations are required, the designer should take into account the following factors:
 - Volume of Daily Usage (Number of Anticipated Cycles)
 - Deflection of Door Due to Wind and/or Stack Load Pressures
 - Stability of Door Under Operation (How Much the Door Flexes When Pushed)

For assistance in design applications, please contact CRL Technical Sales.

CRL Storefronts Online Design and Glass Size Program

- An Innovative Web-Based Program that Generates Glass Sizes from Measurements You Take in the Field
- Access 24/7 at www.crlaurence.com
- Frameless Storefront Designs Have Never Been So Easy
- Simply Push the Print Icon Upon Completion of Data Entry to Generate Complete Glass Sizes
- Built-In Safety Features Ensure CRL Approves of Design and Specifications
