With an iconic form that captivates, the Meridian sliding glass door is the model for contemporary barn door design. Featuring a 400 lb maximum weight capacity, Meridian is well-suited for heavier doors in residential and commercial settings.

Meridian's simplified profile is a result of precision engineering and attention to every detail. The system features concealed ball bearings, track fasteners, and door mounting hardware to produce a striking aesthetic that can't be ignored.

Features & Benefits

- 400 lb (181 kg) maximum door weight
- For 3/8" (10 mm) to 1/2" (12 mm) monolithic tempered glass
- High-grade 6061-T6 and 6005A-T61 aluminum construction
- Concealed fasteners and ball bearings
- Wall mount or glass mount
- Adjustable door height, track height, and door stops
- Tested to 1,000,000 cycles
- Track can be cut to size or extended with track connectors
- Configurations for single and bi-parting doors
