

READ INSTRUCTIONS BEFORE USE

USE STRAIGHT OR DILUTED BY 50% WITH COOL WATER. ALWAYS WEAR RUBBER GLOVES, PROTECTIVE CLOTHING, BOOTS AND SPLASH GOGGLES. AVOID CONTACT WITH SKIN.

Always use plastic pails and containers. Do not use metal or painted containers.
Clean window glass before using CRL Water Spot Remover. CRL Water Spot Remover is NOT a cleaner.

ALWAYS TEST GLASS BEFORE APPLYING CRL WATER SPOT REMOVER TO ENTIRE WINDOW.

Check for surface coatings and residues such as silicone treatment, building sealer and waxes. (According to some glass manufacturers, silicone treatments and building sealers may be removed by applying toluene first to soften the film and a low abrasive rubbing compound to remove the residue.)

CHECK BOTH SIDES OF GLASS FOR STAGE II CORROSION. (GLASS WILL USUALLY TURN WHITE WITH COATINGS AND STAGE II CORROSION WHEN TESTED.) STAGE II CORROSION IS NOT CORRECTABLE AND GLASS SHOULD BE REPLACED.

Apply CRL Water Spot Remover with a natural sponge or a clean, white cloth. Wring sponge or cloth to prevent runoff. Keep solution from running down any building or other surfaces. If product runs down the glass, it is being overused. Apply for one to two minutes, then rinse with water or a diluted solution of trisodium phosphate. Repeat as necessary.

DO NOT USE CRL WATER SPOT REMOVER ON WINDOW FRAMES OR ANY NON-GLASS SURFACE. DO NOT USE ON SELF-CLEANING (TITANIUM) GLASS. RINSE AWAY ANY SPILLS IMMEDIATELY.

NOTE: If glass becomes hazed or white, proceed no further until you can determine if it is a coating, building sealer or Stage II corrosion, or if given permission by supervision or building management personnel.

CAUTION:

Contains Acid: CAS 7664-39-3. Do not take internally. Do not rub in with fingers or permit contact with skin or eyes. Always wash hands and contaminated skin after using, paying particular attention to skin under nails. Avoid breathing vapors.
