

Every pane a masterpiece.

i-Glass®

# i-Glass®

## Among the industry's highest resolution glass printing available.

Imaginative. Inspiring. Innovative. i-Glass® captures every nuance in vibrant color with stunning 1440 dpi. Designed to print directly on heat-treated, monolithic, laminated and insulating glass, our new, screenless technology lets you use the ultimate glass canvas for infinite possibilities.

### The i-Glass® edge

**Wide range of tints, tones and shades:** Our color palette provides a large selection of hues for nearly infinite color possibilities.

**More vivid colors:** A new line of inks offers more brilliant shades of red, yellow, and orange, as well as magenta, to further broaden our spectrum.

**The colors of luxury:** We can provide inks that print the colors of precious metals – gold, platinum, and luster – for your most luxurious projects.

**Gradient patterns:** From lines to dots and various patterns, precise designs are available in a variety of options for striking visuals and solar control.

**Energy performance:** We can provide solar heat gain and visible light transmittance values based on the desired design.

**Bird-friendly glass:** Creative designs and rich tones support bird-friendly applications, including options for first and second surface printing.

**Beauty that lasts:** Our ink has extremely high resistance to the effects of wear, abrasion, UV radiation, and climatic stress.
