

## **MICROFIBER WIPES** **MF50B, MF12, BGCX2**

### **Benefits of Microfiber Wipes**

The primary benefits in using microfiber cleaning products are:

- Excellent performance and efficiency
- They can be laundered and reused hundreds of times

### **Washing Microfiber Products**

- Saves water, detergent and chemicals, energy usage and money when compared to washing conventional cotton mops, cloths & towels

### **Microfiber Washing and Care Instructions**

- 1) Wash & dry microfiber products **ONLY** with other microfiber products. Never mix microfiber with any other material or fabric
  - This is the most common and by far costliest mistake when washing microfiber products. Cotton releases lint and fibers that will damage the performance and effectiveness of the microfiber
- 2) Never use BLEACH in the washing cycle
- 3) Do not use FABRIC SOFTENER in the drying process
  - Bleach & fabric softeners contain acids that will burn & destroy the polyamide material within the Microfiber

<b>Washing</b>	<b>Drying</b>
Water temperature 160°	Low to medium heat
Regular detergent	Drying time 10 to 15 minutes
Disinfectant (optional)	

While it is acceptable to wash all Microfiber products together, it is recommended that the Microfiber Dust Mops be washed separately
