

Solar Eclipse™  
Shade, evolved.

## Stellar design starts with Solar Eclipse.™

The beauty of our sunshades is in the details. We engineer every aspect to ensure you never have to sacrifice style for substance. Easy to install and flexible in design, both our Solar Eclipse™ Sunshade System and Solar Eclipse™ Single Blade Sunshade pair seamlessly with many of our popular storefront and curtain wall products, including Reliance.™ So your buildings can be equally elegant and efficient. That's the power of Solar Eclipse.™

### Solar Eclipse™ Single Blade Sunshade

**Shapes:** Adjustable single airfoil blade configuration.

**Sizes:** Projections available at 11", 13", 14", 15" & 17" from face of glass, based on 0° rotation.

**Angle options:** Available in 5° increments up to 35° with no pre-set angle.

**Applications:** Apply horizontally or vertically to increase performance – and aesthetic appeal – no matter which direction windows face.

**Efficient installation:** Installers can easily angle shades as needed on site. Plus, our standard 90° corner solutions ensure consistency and ease of installation.

### Sunshade in all kinds of shades.

Both our outrigger-and-louver and single blade options are available in a large selection of colors and anodized finishes to match your creativity.\*

Commercial and superior performance paints conform to AAMA 2603, 2604 and 2605 protocols.

Commercial and superior performance anodized finishes conform to AAMA 611 protocol.

### Exceedingly efficient.

Our Solar Eclipse™ products allow daylight indoors while reducing solar heat gain by minimizing direct sunlight penetration. They also contribute to LEED credits in multiple areas.

### Solar Eclipse™ Outrigger Sunshade

**Sizes:** Standard projections available at 24", 30" and 36" from face of glass.

**Possibilities:** Explore our nearly endless design of outrigger and shade structure, louver shapes and configurations.

**Fabrication options:** Louvers are available factory assembled if required or in stock lengths for customer fabrication to fit your building schedule and field conditions.

**Shapes:** Traditional outrigger-and-louver design available in a variety of styles: circular, radius, square, rectangular, airfoil, diamond, Z-shaped.

\*Outriggers available in painted finishes only
