Water + thermal protection

Low operating force (≤ 5 lbf)

Low-profile 1/2" sill

Oldcastle BuildingEnvelope®

Terra Swing™ Access

Compliance and performance. Uncompromised.

Terra Swing™ Access

Compliance you need. Performance you want. Our new Terra Swing™ Access terrace door is designed to current ADA standards so you can be confident in the product you specify. With the unmatched capability of Terra Swing™ Access, you can officially stop compromising.

Industry-leading compliance

Lighter ≤ 5 lbf of operating force per AAMA 513.

Small 1/2" threshold designed for easy access to outdoor spaces.

Integral 10" kick rail — compliant with ADA requirements — is included so you can avoid pricey add-ons and delayed lead times.

Industry-leading performance

Water performance of 15 psf on our low 1/2" threshold matches the performance of the systems around it like window wall and curtain wall.

Industry-leading thermal performance as low as 0.39 U-Factor with 0.24 COG and integral 10" kick rail. NFRC simulated.

Industry-leading confidence

Our 10-year warranty provides confidence in the product you choose, while lead times as low as six weeks meet your project needs up to four times faster than leading competitors.

Builds on our industry-leading Terra Swing™ entrance patented designs.

Design flexibility

Three different hardware color options (black, white, finished neutral) ensure your doors look as good as they perform.

Simplified installation

Small 1/2" threshold sits directly on the floor, so you don't have to recess the concrete during installation to accommodate the threshold, saving time and money.

The threshold's field-installed exterior trim allows for a continuous exterior perimeter seal without relying on a blind seal.

Adjustable hinges for field adjustment and alignment post-installation.

Model system performance with SystemSelect™

Compare thermal and visual performance details for Terra Swing™ Access and entire architectural glass and metal systems quickly with our free online tool.
