

DRX™ Door Rail Kit + Modular Header System

Smarter, Faster, Now Field Ready

Introducing the patented DRX Door Rail Kit and Modular Header System—two complementary and customizable glass door solutions designed to offer complete control over when, where, and how glass doors are assembled and installed.

Since DRX Door Rail Kits and Modular Headers can be stocked and cut to the desired length in the shop or in the field, it eliminates manufacturer lead times and reduces delays to get the job done faster. This industry-first innovation revolutionizes glass door customization.

DRX Door Rail Kits

It's no longer necessary to wait on custom door rails or to order them in bulk. Each DRX Kit includes everything needed to assemble one door rail of any length below 48", and for 3/8" to 3/4" glass. The kits simplify ordering and stocking so door rails are readily available when needed.

Each Kit Includes:

- (2) 10-1/2" DRX™ Rail Bodies
- Adjustable Slide Block
- (2) End Caps
- (2) 48" Side Cover—Cut to Desired Length
- 8-foot Gasket
- (CRL777S) Lock Option Available

Available Finishes:

- Satin Anodized
- Black Bronze Anodized
- Matte Black Powder Coat
- Brushed Stainless Steel Cladding

Modular Header System

CRL's new Modular Header is designed to work hand-in-hand with DRX Kits. The Modular Header can be cut to the desired length, and using our proprietary precision jig, mounting holes can be drilled on-site to match the opening. No factory prep is required.

Need a double-door setup? Use our splice connector to create a continuous modular header that spans both doors. Modular Headers are shipped pre-drilled for door closers.

Available Finishes:

- Satin Anodized
- Black Bronze Anodized
- Matte Black Powder Coat
- Brushed Stainless Steel Cladding
